

## Treatment Tasks for Systemic Dynamics

### Family

- Share trauma integration with appropriate system people.
- Assure caretaker has necessary resources.
- Develop parenting skills.
- Implementation and maintenance of appropriate boundaries.
- Improve communication and understanding of developmental and emotional needs of child.

### School and Community

- Communicate with school (i.e., teachers, counselors).
- Gain support of appropriate community resources.

### Client

- Educate client about availability and use of community resources.
- Work with client to re-gain faith in the community in which the client might feel betrayed or lack trust due to the traumatic incident or events following the traumatic incident.
